Technical Data Sheet

CarboTech D 55/2 Extra

Cylindrical extruded pellets with a grain diameter of approx. 2 mm

Product Description

CarboTech D 55/2 Extra activated carbon pellets are produced by steam activation from selected hard coal.

Specification

Specification			Method
Bulk density	[kg/m ³]	550 ± 30	ASTM D2854
Moisture (as packed)	[wt-%]	max. 5.0	ASTM D2867
CTC	[wt-%]	min. 40	ASTM D3467

Typical Properties

BET-surface	[m ² /g]	700	DIN 66132
Ignition point	[°C]	400	CT-Method
Hardness	[%]	98	ASTM D3802

DAT/1/D_55-2Extra/04/12

Typical properties are only for general information and can vary. They are not to be used as purchase specifications
